

Certified ScrumMaster – Certified Scrum Developer Dual Certification Week

Become a Certified ScrumMaster & Certified Scrum Developer in just 5 days!

This 5-day, dual-certification training program will provide you with the essential skills necessary to perform as a top ScrumMaster and Scrum Developer. You will learn from programming labs, discussion and more than 20 hands-on exercises.

MASTER SKILLS FOR SUCCESSFUL SCRUM SOFTWARE DEVELOPMENT

This 5-days of training comprises:

- 1. The 2-day Certified ScrumMaster workshop taught by Bob Hartman, CST.** Bob is an experienced Scrum trainer and coach whose clients have included HP, Weyerhaeuser, and Starz Entertainment.
- 2. The 3-day Scrum Software Development Essentials workshop taught by David Bernstein, CSD.** During the last 25 years, David has shared his passion for improving software design and construction, training more than 6,000 developers from IBM, Microsoft, and other Fortune 500 companies.

Attending these immersive courses will enable you to:

- Understand the Scrum framework, roles, artifacts and ceremonies
- Recognize the key differences between Scrum and waterfall development
- Lead a Scrum team to plan and prioritize their backlog
- Facilitate each type of Scrum meeting
- Identify and correct potential impediments to Scrum success
- Collaborate more effectively with other team members
- Establish standards and practices for rapidly building quality software
- Use test-first development to drive design
- Write stories and build features in sprints
- Accurately estimate development tasks
- Quickly identify design alternatives
- Gain skills for working with legacy code
- Employ techniques that reduce defects
- Avoid upfront overdesign and practice just-in-time design
